

IN THE CLAIMS

Please amend the claims as the follows.

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

Claims 1-20. (Cancelled)

21. (New) A cutaneous diagnostic kit comprising:

at least a central body having an upper surface mounted to a single body of gripping and pressure, a lower surface having a sharp edge on the external circumference, a cavity being disposed around a central axis of the central body and having a lower end extending beyond the horizontal plane of the sharp edge, a multipoint needle assembly mounted to the cavity, a flexible ring having an inner edge mounted around the central body and an outer edge held by a rigid support, a blister fixed on the support and the lower surface of the central body, and at least an allergen composition filled in the cavity and the surrounding space between the blister and the lower surface of the flexible ring and the central body.

22. (New) The cutaneous diagnostic kit as in claim 21, comprising a plurality of substantially identical central bodies.

23. (New) The cutaneous diagnostic kit as in claim 22, comprising three substantially identical central bodies.

24. (New) The cutaneous diagnostic kit as in claim 23, wherein each of the central body is separated by different distance.

25. (New) The cutaneous diagnostic kit as in claim 24, where the distance between the first central body and the second central body is about 1 cm to 3 cm, the second central body and the third central body is about 2 cm to 4 cm.

26. (New) The cutaneous diagnostic kit as in claim 21, wherein the height of the cavity is about 0.2 cm to 1 cm.

27. (New) The cutaneous diagnostic kit as in claim 21, wherein the multipoint needle assembly is fixed on at least a crown.

28. (New) The cutaneous diagnostic kit as in claim 21, wherein the multipoint needle assembly is fixed to a plurality of concentric crowns.

29. (New) The cutaneous diagnostic kit as in claim 21, wherein the multipoint needle assembly contains eight points equally distributed and fixed on two crowns.

30. (New) The cutaneous diagnostic kit as in claim 29, wherein the eight points are fixed to two concentric crowns in which four points are fixed to each crown and angularly positioned in alternation.

31. (New) The cutaneous diagnostic kit as in claim 21, wherein the allergen composition is in liquid form.

32. (New) The cutaneous diagnostic kit as in claim 31, wherein the liquid form is a gel, a solution, an emulsion or a suspension.

33. (New) The cutaneous diagnostic kit as in claim 21, wherein the allergen composition comprises a mixture of pollens' allergens.

34. (New) The cutaneous diagnostic kit as in claim 33, wherein the pollens' allergens comprise proteins PR10, pectase lyase and profilines.

35. (New) The cutaneous diagnostic kit as in claim 21, wherein the allergen composition comprises a mixture of food allergens.

36. (New) The cutaneous diagnostic kit as in claim 35, wherein the food allergens comprises chitinase, and lipid transfer proteins.

37. (New) The cutaneous diagnostic kit as in claim 21, wherein the allergen composition comprises a mixture of domestic environmental allergens.

38. (New) The cutaneous diagnostic kit as in claim 37, wherein the domestic environmental allergens comprise acarids' allergens, and superficial body growth of dog and cat and molds.

39. (New) The cutaneous diagnostic kit as in claim 38, wherein the domestic environmental allergens further comprise tropomyosines, profilines and cystine proteases.

40. (New) The cutaneous diagnostic kit as in claim 21, wherein each central body contains different allergen compositions.
